

SoreFix®

Goodbye sore, hello smile

Rescue cold sore cream for the treatment of cold sores in all 4 phases

SoreFix Rescue cold sore cream is a unique solution with proven efficacy in all 4 phases of a cold sore. SoreFix Rescue cold sore cream relieves the tingle (itch), reduces blisters, shortens healing time and prevents the scab from cracking (see figure "All phases technology"). SoreFix Rescue cold sore cream is a transparent cream to not accentuate the cold sore.

Dosage and use:

For optimal results during treatment, apply the cream 3-6 times a day to the affected area on the lips to avoid spreading of the cold sore. SoreFix Rescue cold sore cream can be safely used during the whole cold sore outbreak, from the initial tingle till the scab has fallen off and the cold sore is completely healed. It is advised to always wash your hands before and after application to prevent contamination. When using lipstick, apply SoreFix Rescue at least 15 minutes in advance.

SoreFix Rescue contains natural oils and is rich in vitamin E. The cream is free of sulphates, free of polyethylene glycols, TEA's, DEA's, parabens and other preservatives.

Carefully read the information leaflet before using SoreFix Rescue cold sore cream, even if you have used this product before. The information may have been updated since you last used SoreFix. Store this information leaflet for future reference.

Precautions for use:

- A cold sore is very contagious. Be extra careful when in physical contact with babies and small children.
- Use SoreFix Rescue cold sore cream only on yourself to prevent infection of others.
- SoreFix Rescue cold sore cream is only suitable for external use on and around the lips.
- Do not use SoreFix Rescue cold sore cream when allergic or oversensitive to one or more of the ingredients. Stop the use of SoreFix Rescue cold sore cream immediately when irritation or an allergic reaction occurs. Contact a health care professional if symptoms persist.
- When pregnant, only use if instructed by, and under supervision of, a health care professional. As far as is known SoreFix Rescue cold sore cream can be used during breastfeeding.
- SoreFix Rescue cold sore cream is suitable for adults and children of 4 years and older.
- Contact a health care professional if the cold sore has not improved after 2 weeks and stop using the product.

Note:

To optimize usage comfort, the tube is larger than the actual content. The tube contains 6 ml of the cream. When using for the first time, carefully squeeze possible excessive air out of the tube.
