

SoreFix®

Goodbye sore, hello smile

Active Patch

Duo Patch

Cold sore patch with 0.5% hyaluronic acid

- Stimulates wound healing & relieves itching
- Reduces risk of infection
- Transparent, hypoallergenic, make-up resistant
- Effective for 12 hours

SoreFix Duo Patch is an ultra-thin, transparent, hypoallergenic patch which adheres to the lip. The patch contains hyaluronic acid which carefully moisturises the cold sore. This aids the recovery of the cold sore, relieves itching, creates a protective layer against external influences, reduces the risk of infection and prevents scarring. The patch is effective for about 12 hours, not visible and makeup can be applied over it.

What is herpes labialis?

Herpes labialis is a herpes simplex virus infection that appears as a blister on the lip. These filled blisters are called cold sores.

What are the symptoms of a herpes labialis infection?

The first symptoms are a warm, tingling sensation on the lip and redness. Fluid-filled blisters form within hours. A cold sore can be triggered by a weakened immune system, fever, menstruation, stress, exposure to intense sunlight, or a reaction to certain nutrients. A cold sore can always reoccur because the virus remains present and can be reactivated by the causes previously stated above.

What to avoid when you have herpes labialis?

If you have a cold sore, avoid lip contact with other people until the blisters have completely disappeared. Herpes labialis is highly contagious! Avoid very hot or very cold foods as these can make the symptoms worse.

How does SoreFix Duo Patch work?

The soft side of the patch is covered with a hypoallergenic adhesive layer in which the hyaluronic acid is evenly distributed. Hyaluronic acid has the property to store large amounts of water, creating a moist environment under the patch which stimulates wound healing for 12 hours and relieves itching. The patch also forms a barrier on the skin against external influences, reducing the risk of infection and protecting the skin from scarring.

**Usage (see illustrations):**

Wash hands before using the Patch and make sure the skin is clean and dry. Open the packaging **1**, grab the applicator on the opposite side of the patch between thumb and forefinger **2** and then take the applicator with patch out of the packaging **3**. First place half of the patch on the cold sore **4** and then cover the entire cold sore with the other half **5**. If necessary, make-up and lipstick can be applied over the patch. Repeat the treatment until the cold sore disappears completely. For single use only.

**Warning:**

- Can cause an allergic reaction
- Keep out of reach of children

In case of serious incidents, report to the manufacturer and competent authority

Contents: 15 active patches
